HEMANATHAN

Mobile : 7339430216 **Email** : hemanathkumar04508@gmail.com **Location** : Chennai

Summary

Computer Science postgraduate with an MCA degree, specializing in Artificial Intelligence and machine learning. Passionate about building intelligent, real-world applications using Python, Generative AI, and modern AI frameworks. Hands-on experience in developing AI-powered solutions leveraging LLMs, Retrieval-Augmented Generation (RAG), and tools like LangChain, along with API and database integration to create scalable and efficient systems.

Education

Bachelor Of Computer Science 2020-2023
Arignar Anna Government Arts College, Villupuram CGPA - 7.48

Master Of Computer Application 2024-2026
SRM Institute of Technology, Ramapuram CGPA - 9.1

Technical Skills

- LLM
- RAG
- PYTHON
- JAVA SCRIPT
- SQL
- FastAPI
- LANGCHAIN

Soft Skills

- Time Management
- Problem Solving
- Teamwork
- Quick Learner

Internship

Full stack Intern - Inspire Softtech Solutions **12 May 2025 - 20 Jun 2025**

Worked as a Full Stack Developer Intern, where I developed and deployed dynamic web applications using HTML, CSS, JavaScript, and Python. Focused on improving system performance and enhancing user experience through efficient design and implementation. Additionally, performed unit testing and debugging to ensure application reliability, scalability, and smooth functionality

AI Engineer Intern - Conprg Technologies **5 Dec 2025 - 20 Apr 2026**

Worked as an AI Engineer Intern, gaining hands-on experience in building AI-based applications using Python and modern AI technologies. Explored and implemented concepts such as Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), and frameworks like LangChain. Collaborated with senior developers to learn and apply new technologies while developing real-world AI projects and integrating APIs and databases for intelligent and scalable solutions.

Projects

Emotion-Based Music Player

Developed an intelligent web application that detects user emotions and automatically plays music based on the identified mood. Implemented emotion recognition techniques to enhance user experience by providing personalized music recommendations.

AI Resume Matcher

Developed an intelligent web application that detects user emotions and automatically plays music based on the identified mood. Implemented emotion recognition techniques to enhance user experience by providing personalized music recommendations.

Bank AI Assistant (RAG-based)

Built an intelligent banking assistant using Retrieval-Augmented Generation (RAG). Integrated LLMs with external data sources to provide accurate, context-aware responses, enhancing user support experience.
